

Created to fulfill
your Lifelong Ambition

HUMBER Snipe

TO-DAY your cherished ambition to own a Humber can materialise, for now at the lowest price in Humber Snipe history — at a price you can afford to pay — the new Humber Snipe offers a luxurious 5-passenger saloon which maintains the traditional dignity and inherent refinements always associated with the name Humber.

The beautifully streamlined English coachwork is all-steel (fabricated in Australia). The luxurious interior provides roomy comfort for five people, with contour-correct seating, draughtless ventilation and complete

insulation of the body from noise, fumes, heat and cold. The side valve engine with "Cushioned power" mountings gives silent running, virile power and flexible top gear performance. The steering column is easily adjustable to suit the driver's height; "Even-keel" suspension upholds Humber's claim to "the World's most comfortable rear seat ride"; Triplex safety glass, full opening wide angle wind-screen and Triplex windows — these, and other features make the Humber Snipe outstandingly attractive to you. In your own interest, you should arrange for a demonstration soon.
